troubleshooting

problem

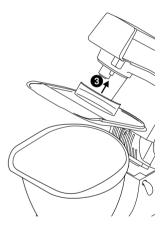

- The whisk or K-beater knocks against the bottom of the bowl or isn't reaching the ingredients in the bottom of the bowl.
- solution Adjust the height. Here's how:
 - 1 Unplug.
 - 2 Raise the mixer head and insert the whisk or beater.
 - 3 Hold it, then loosen the nut 1
 - 4 Lower the mixer head.
 - 5 Adjust the height by turning the shaft. Ideally the whisk/K-beater should be **almost** touching the bottom of the bowl 2
 - 6 Raise the head, hold the whisk/K-beater and tighten the nut.

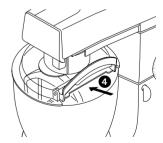

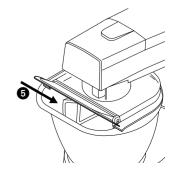

to fit and use your round/D-shaped splashguard (if supplied)

- 1 Raise the mixer head until it locks.
- 2 Fit the bowl onto the base.
- 3 Push the splashguard on until fully located **3**. The hinged section should be positioned as shown round **4** and D-shaped **5**
- 4 Insert required tool.
- 5 Lower the mixer head ensuring the splashguard follows the shape of the bowl.
- During mixing, ingredients can be added directly to the bowl via the hinged section of the splashguard.
- You do not need to remove the splashguard to change tools.
- 6 Remove the splashguard by raising the mixer head and sliding it down.
