De' Longhi uses Recycled paper

Data for test heating performance in accordance with IEC 705

The International Electrotechnical Commission, SC 59H, has developed a standard for comparative testing of heating performance of different microwave ovens. We recommend the following for this oven:

Test	850/900W input power	Power level	Weight	Standing time
	Approx. time			
A	14 - 16 min		750 gr	5 min
B	7 - 8 min		475 gr	5 min
C	18 - 20 min		900 gr	5 min
Defrosting minced meat	9 - 11 min turn once halfway through cooking		500 gr	15 min

Test B must be performed with the container placed on top of an overturned soup dish (approx. 4 cm high) placed on the turntable. All the other tests must be performed with the container placed on the turntable.

DESCRIPTION

A Control panel
B Turntable spindle
C Interior, door side
D Turntable

E Turntable support
F Microwave outlet cover
G Rack
