

# De'Longhi quick guide

## ironing system VVX1000

To get the best from your ironing system it is advisable to read the full instructions as well.

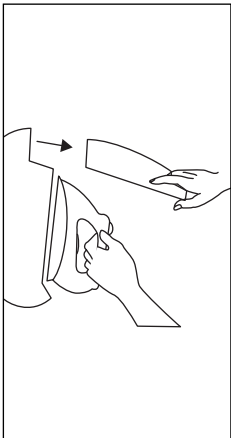

### 1. SETTING UP

Place your ironing system on a flat, stable, heat resistant surface.

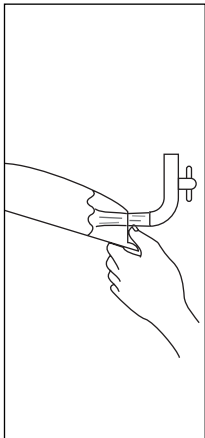

### 2. FILLING THE WATER TANK

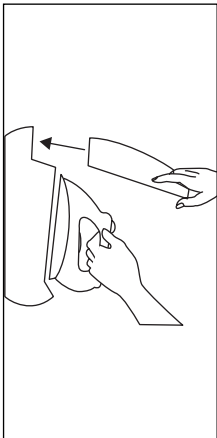

Whilst holding the iron steady on its base, remove the water tank....

...remove tank cap and fill with water...

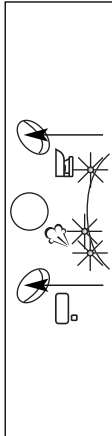

...and push the tank firmly back into place.

Living innovation

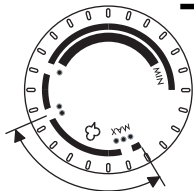

### 3. PLUG IN & SWITCH ON

Plug in at the mains and switch the iron and boiler on.

### 4. THERMOSTAT

Position the thermostat dial on the handset depending on the type of fabric to be ironed ...

●	●●	●●●	●●●●
Acetate, acrylic, nylon, polyester, rayon	Silk	Wool, cotton, fine linen	Cotton, linen, starched clothes

...and adjust the

steam control

e.g. clockwise

towards

maximum for

denims and linens

### 5. READY TO USE

The iron is ready to use when the orange steam light on the control panel and the orange temperature light on the handset go out.

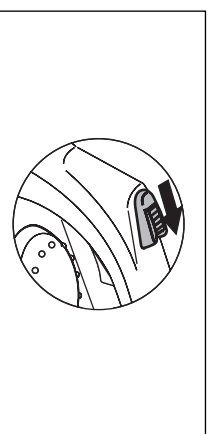

### 6. USING STEAM

To obtain steam, press the button on either the top or underside of the iron handle. The steam will stop when you release the button.

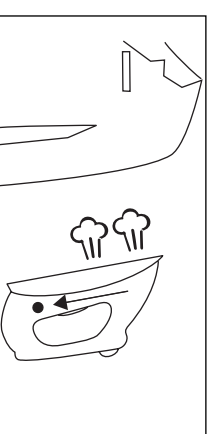

There is a lock on the steam button for your convenience. Slide backwards to lock and forwards to unlock.

### 7. VERTICAL IRONING

Set the thermostat dial and steam emission control to maximum. Holding the iron in a vertical position, press continuously on the steam button and move the iron up and down the garment.

Please note: you may hear the 'Gravity Ball' roll into place when lifting the iron into a vertical position.
