De'Longhi quick guide

How to make perfect espresso coffee

1. Fill the water tank with fresh, clean water to the level required either by removing and filling at the sink or with a jug (do not exceed max level)
2. Place the tank back in the coffee maker, pressing it down firmly with the lid closed.
3. Turn the selector knob to the "ON"  position
4. Place the filter with frother into the filter holder
5. Fill the filter with desired amount of coffee
6. Press the filter holder up to the coffee tamper to pack the coffee tightly
7. Place the filter holder beneath the boiler outlet pushing up and rotating to the right until it locks
8. Place cup(s) on the drip tray underneath the filter holder
9. When the 'OK' light is lit, turn the selector knob to espresso function 
10. Allow water to flow until the "OK" light goes out then turn the selector to the  off position

How to make filter coffee

1. Fill the water tank with fresh, clean water to the level required, either by removing and filling at the sink or with a jug (do not exceed max level).
2. Place the tank back in the coffee maker, pressing it down firmly, with the lid closed.
3. Open the filter holder door by pulling it to the right.
4. Place the paper filter (if supplied) into the filter holder.
5. Put the ground coffee into the filter by using the measuring spoon included with the machine and level evenly.
6. Close the filter holder and place the carafe with the lid on the hot plate, make sure it is placed centrally.
7. Choose the desired flavour by turning the 'flavour system' knob.
8. Press the "ON/OFF" switch for filter coffee
9. The coffee will begin to drip out after a few seconds.
