I. 开始操作

安装滤水器

1. 取出滤水器(E)
2. 从水箱中取出空间补偿器(B)
3. 放入滤水器。(请保存好空间补偿器，在取出滤水器时，必须将其放入。)
4. 每隔2个月更换滤水器。请将滤水器更换指示刻度(F)对准下次更换的月份，作为提醒。

注意

首次使用咖啡壶之前，或较长时间没有使用之后，以及安装一个新的滤水器后，用大量的新鲜冷水，不加咖啡粉，操作一次。

II 调理咖啡

将新鲜的冷水注入水箱，按下按钮(G)打开过滤网篮，放入4号滤纸或尼龙滤网NF4，加入咖啡粉，将玻璃杯置于加热板上，然后打开咖啡壶开关。为方便加入或倒出咖啡粉，过滤网篮的铰链可以方便地取下。在咖啡还未全部煮好时，如取出玻璃杯倒咖啡，防滴漏装置可阻止咖啡从过滤网篮中继续滴落。随即请将玻璃杯放回加热板以防止过滤网篮中的咖啡溢出。

每杯咖啡的调理时间：大约1分钟。因为咖啡会吸收水份，所以调理完的咖啡会少于刚开始注入的水量。

型号KF550是具有自动断电（auto-off）功能的产品。运行2小时之后，开关自动返回到断开位置。

III 滤水器

滤水器能最大程度的去除氯和其它异味，使咖啡味道更纯。如果定期更换滤水器（每隔二月），不仅能提供味道纯正的咖啡，而且能通过防钙化而延长咖啡壶的寿命。在零售店或Braun服务中心能购买到Braun滤水器。

IV 清洁

请务必在清洁前拔出电源插头。不得在流水中清洗，也不得将其浸入水中清洗；仅可使用湿布进行清洁。所有可拆卸零件均可在洗碗机中清洁。

V 除钙（无图示说明）

如您用硬水且没有用滤水器，必须定期进行除钙。如使用了滤水器并定期更换，通常情况下不需要除钙。但是，如果咖啡壶在调理时花费的时间比正常时间久，则必须进行除钙。

注意：在任何除钙过程中，用空间补偿器代替滤水器。

- 您可使用市售不会影响铝质的除钙剂。
- 遵照除钙剂制造商的使用说明。
- 如有需要请重复进行清洁的程序，以使每杯咖啡的调理时间恢复成正常。
- 用大量的新鲜冷水运行至少二次以清洗咖啡壶。

调理出香醇咖啡的秘诀

本咖啡壶经精心设计能使咖啡散发出浓郁的香气。因此，Braun建议：

- 仅使用新鲜的咖啡粉。
- 咖啡粉应装入密封容器，并贮藏在阴凉、干燥及避光处(如冰箱中)。
- 仅使用Braun滤水器且正常使用时每隔二个月更换。
- 参照第IV和V说明部分对咖啡壶进行定期清洗和除钙。

如有更改，恕不另行通知。

I Setting into operation

Installing the water filter cartridge
(not included in model KF 500 / KF 510; may be purchased separately)

1. Unpack the water filter cartridge Ⓔ.
2. Remove the space compensator Ⓑ from the water tank.
3. Insert the water filter cartridge. (Be certain to keep the space compensator as it must be installed in the water tank whenever the water filter cartridge is removed.)

4. The water filter should be exchanged every two months. To remind you, set the dial Ⓕ to the month that the water filter should be replaced.

N.B.

Before using the coffeemaker for the first time, after a long period of not using it, or after installing a new water filter cartridge, run the coffeemaker through one brewing cycle using the maximum amount of cold, fresh water without any ground coffee.

II Making coffee

Fill tank with cold, fresh water, press filter push button Ⓖ to open filter basket, insert a No. 4 paper filter, put in ground coffee, place the carafe on the hotplate and switch on the coffeemaker. For more convenience when filling with or disposing of ground coffee, the filter basket can be easily taken off its hinge. A drip-stop prevents dripping when the carafe is removed to pour a cup before brewing is finished. Carafe should be immediately returned to hotplate to prevent the filter basket from overflowing.

Brewing time per cup: approx. 1 minute. Amount of brewed coffee in the carafe will be below initial filling level as water is retained by ground coffee.

Model KF 550 is equipped with an automatic shut-off feature (auto-off). After a maximum of two hours of operation the coffeemaker will automatically switch off.

III Water filter

The water filter improves coffee flavor by removing chlorine, bad tastes and odors as well as scale. If the cartridge is replaced regularly (every two months), it provides not only better tasting coffee, but also can extend the life of your coffeemaker by preventing calcification. Braun water filters are available at your retailer or Braun service centre.

IV Cleaning

Always unplug the appliance before cleaning. Never clean the appliance under running water, nor immerse it in water; only clean it with a damp cloth. All removable parts are dishwasher-safe.

V Decalcifying (without illustrations)

If you have hard water and you use your coffeemaker without a water filter, it has to be decalcified regularly. When using the water filter cartridge and exchanging it regularly, you normally will not need to decalcify. However, if your coffeemaker takes much longer than usual to brew, it should be decalcified.

Important: Replace water filter with the space compensator during any decalcification procedure.

- You can use a commercially available decalcifying agent, which does not affect aluminum.
- Follow the instructions of the manufacturer of the decalcifying agent.
- Repeat the procedure as many times as necessary in

order to reduce the brewing time per cup to a normal level.

- Allow the maximum amount of fresh cold water to run through at least twice to clean the coffeemaker.

Best practices for best results

This coffeemaker is designed to deliver maximum coffee aroma. Therefore, Braun recommends:

- Use only fresh ground coffee.
- Store ground coffee in a cool, dry and dark place (e.g., refrigerator) in an airtight container.
- Use only Braun water filters and exchange every two months with regular use.
- Clean and decalcify coffeemaker regularly as described in parts IV and V.
