De'Longhi quick guide

HOW TO PREPARE FILTER COFFEE

1. Lift the lid and remove the water tank.
2. Fill the tank with fresh, clean water up to the level corresponding to the number of cups of coffee required.
3. Place the tank back in the coffee maker, pressing it lightly into place.
4. Open the filter holder door by pulling it to the left.
5. In versions with a permanent filter, place the filter in the filter holder . In other versions, use the size "4" paper filter.
6. Place the ground coffee in the filter, using the measuring spoon supplied, and level evenly
7. Close the filter holder door and place the jug, with the lid on, on the warming plate, make sure it is placed in the centre.
8. Choose the desired flavour by turning the flavour adjustment knob.
9. Press the "ON/OFF" switch.
